President’s Message:

Wow! Dark at 5PM. I guess evening flying at the field is done for the season. Not to worry, there will still be good days and weekends. With the winter season kicking in there is still plenty to do.

- On Saturday, November 19th Walt’s Hobbytown will again hold its Secret Santa sale. We will have a table to display our aircraft. There will be lots of good deals in the store and lots of interesting things to observe.
- Planning has begun for the Model Forum. It will be held on Jan 21st . The next planning meeting is on Friday Nov 18th at 7:30 at the CIA. Feel free to attend. We need fresh faces and ideas!
- Our annual Christmas party will be on December 9th at Anheuser Busch. Details will be included in the next newsletter. Thanks again to Kevin Kiniry for securing this facility for us!
- Another annual event is our New Years Day fun fly. I probably don’t have to tell you the date. We will start at around 11AM at the main hangar. The club will provide burgers, dogs and drinks. Bring a small dish to pass if you want. Bring something to fly. The pilot’s lounge is heated.
- The AMA has sent out election ballots for 2017. There are 3 candidates for president. Please read their campaign statements carefully and be sure to submit your ballot before **November 8th!**
- As the weather gets worse, consider indoor flying at the CIA. For more information, contact Phil Artese. His contact information is on the left.

See you soon!

Herb.

small Unmanned Aerial Systems

MVCC
MOHAWK VALLEY COMMUNITY COLLEGE

Associate in Applied Science (AAS) degree program

From expedited package delivery to agriculture and environmental research, the commercial potential for **small Unmanned Aerial Systems (sUAS) — more commonly known as drones** — has only just begun to come into focus. MVCC's sUAS degree program is designed to equip students with the education and training to work and think critically in this lucrative and rapidly developing field.

MVCC's sUAS program has a flexible schedule — including **day and night classes, online and classroom instruction, hands-on labs, and field experience**. The interdisciplinary curriculum teaches students to design and build sUAS, as well as mission planning and operations, flight skills, and programming. Ethics, as well as Federal Aviation Administration rules and regulations, will be emphasized. Coursework will explore modeling and fabrication using **MVCC's FABLab**, drafting and design using AutoCAD, electronics, mechanics, and software programming. Students will hone their operation and flight skills on professional equipment in **MVCC's state-of-the-art flight simulator lab**.

Students also will learn about the various applications for sUAS, including:

- Disaster assessment
- Law enforcement/search and rescue
- Photography and videography
- Military use
- Weather reporting

Employment
According to the Association for Unmanned Vehicle Systems International, the industry is expected to generate an additional 100,000 jobs and \$82.1 billion in economic impact in the next decade.

Apply today!
Free application:

Public Service Announcement: Don't text and drive!

Look what I found in my driveway one evening. This photo was taken after the truck was put back on its wheels. It was a perfectly sunny day on a perfectly straight stretch of road. The guy admitted to texting. He went off the road about 200 feet away and when he hit the end of my driveway the truck rolled over 270 degrees and ended up on the drivers side. The guy only had a bump on his head. No seat belt. Really lucky.

If you ever call me or text me and I'm driving, I won't respond until I stop somewhere.

Calendar 2016-2017

Fri, Nov 11	7PM	Walt's Hobbytown	Club Meeting
Fri, Nov 18	7:30PM	CIA	Forum Meeting
Sat, Nov 19	8:30-5:00	Walt's Hobbytown	Secret Santa Sale
